MAXX

Max Systems Pvt. Ltd.

About Us

Founder Mr. S. Datta established the company Max Systems Private Limited in 1986. The ISO 9000-2000 Certified company stands as one of the pioneers in UPS manufacturing and Non-IT services of Data Center in India. The company is headquartered in Delhi and has direct presence in 25 states across country.

We specializes in providing maintenance of Data Center Non I T equipment's like UPS , BMS, FMS, F&S, Air cooling systems, Bio metric, Generator, electricals under AMC support. We provide support at more then 130 locations ensuring service of the highest quality. To ensure the excellence in our services, we have qualified expert to train our staff with the latest evolving standards, platforms and technologies.

Data Center Management

Effective Data Center Infrastructure Management (DCIM) and system monitoring strategies not only ensure that resources are utilized to the fullest, but can also help to mitigate human error and other causes of downtime. In addition, these monitoring systems can help facility managers deal with the rising complexity of current customer environments.

Management of large data sets and hardware systems being a part of vast disseminated network is data center management. Keeping information secure to prevent data security disruptions, data management, information the executives assumes a significant part.

The hosted computer setting is explicitly managed which are located within a data center.

Max Systems Pvt. Ltd.

Building Management System (BMS)

The Building Management System (BMS) controls the mechanical infrastructure and provides real-time monitoring of facilities equipment and actively manages cooling performance. The system can automatically react to variabilities as needed by turning equipment on and off, opening or closing valves and increasing airflow to keep cooling level. This automation reduces the chance for human error, but also considers the need for human interface. The system also alerts facilities management team of potential failures so issues can be address before they become catastrophic problems.

BMS is integrated with all equipment's through ethernet, which are compatible with BMS.

At MAXX, we are specialized in Modbus configurations.

MAXX, is also authorized integrator of brands like Honeywell and Siemens etc.

Max Systems Pvt. Ltd.

Our Services

MAXX

01
MECHANICAL SERVICES

- Access Control System
- Vesda
- CCTV System
- Rodent Repellent (RR)
- WLD system
- PA System (Public Allowance)

02
ELECTRICAL SERVICES

- Control Panel
- Automatic Transfer Switch
- Battery Monitoring System
- LT / HT PANEL
- Circuit Breaker
- Changeover Switch

02
ELECTRICAL SERVICES

- Cabling
- Lighting & Fixture
- Earthing

Max Systems Pvt. Ltd.

Our Services

MAXX

03 — FIRE & SECURITY SERVICES

- Fire Alarm System
- FMS PANEL
- Bio Metric
- FM 200
- NOVEC

04 — COOLING SYSTEM SERVICES

- Chillers
- PAC (Precision Air Conditioning)
- HVAC
- Duct AC
- Window / Split AC

05 — POWER CONDITION SERVICES

- UPS (Upto 500 KVA)
- Generators (Upto 2000 KVA)
- Parallel UPS
- Modular UPS

06 — OTHER SERVICES

- BMS (Building Management System)
- FMS (Facility Management System)
- Civil work
- Resources

Max Systems Pvt. Ltd.

Mechanical Services

ACCESS CONTROL

Access control systems are designed to keep people, premises, and data safe. Our security management system can integrate multiple businesses, buildings, and security systems to achieve interactive, realtime security management.

CCTV

Given the value of proprietary data and IT equipment, everything that happens on the server room floor could potentially impact a company's business. By keeping a visual record of all activity that takes place during every visit, data center security personnel can diagnose problems more easily and account for every variable in play.

RODENT REPELLENT SYSTEM

Rodent repellent is a device unit that emits ultrasonic sound waves to create an acoustically hostile environment that repels rodents. This helps to keep your Data Center free from rodents. The frequency of sound will induce rodents to move away from Data Center.

Max Systems Pvt. Ltd.

Electrical Services

HT / LT PANELS

Panelboards consequently allow for 'selectively tripping' of branch breakers meaning that only the affected branch circuit goes offline, opposed to a whole panelboard, or the whole system. This allows for the minimal amount of interruption possible facility-wise, and is preferable to shutting down the entire switchboard for maintenance or repairs.

BATTERY MONITERING SYSTEMS

We create Battery Systems that works with our customers to create CUSTOMIZED SERVICE PROGRAMS specifically designed to fit all their business needs.

MAXX

Max Systems Pvt. Ltd.

Electrical Services

MAXX

CABLING

We also provide excellent cabling, light, fixture and earthing services which is crucial for your business

Max Systems Pvt. Ltd.

Fire & Security Services

Fire alarm and detection system is required for the following reasons:

- To detect fire in the area during the initial stage.
- To alert occupants, so that they escape the building safely.
- Summon trained personnel to take charge of controlling the fire as quickly as possible.
- To initiate automatic fire control and suppression system.
- To support and supervise the fire control and suppression system

Types of Fire Detectors

- Smoke detector
- Fire detector
- Heat detector

Max Systems Pvt. Ltd.

Cooling System Services

PRECISION AIR CONDITIONER

The precision air conditioners , also known as a CCU (close control units) or CRAC (computer room air conditioner) are refrigerating equipment specifically designed to provide precise control of temperature and humidity in all applications in which is required a very high degree of precision

HVAC(Heating, Ventilation and Air-Conditioning)

The main parts of the HVAC system are a heating, a ventilation, and an air- conditioning unit. ... Heating is most often done by a furnace or a boiler in residential buildings. It also includes a pipe system for the fluid delivering the heat, or a duct work for forced air systems

Chiller Plant

A chiller is a machine that removes heat from a liquid via a vapor-compression or absorption refrigeration cycle. This liquid can then be circulated through a heat exchanger to cool equipment, or another process stream (such as air or process water).

Max Systems Pvt. Ltd.

Power Condition Services

MODULAR UPS

MAXX

GENERATOR

Supplying uninterrupted power to data centers 100% of the time is critical for operations. Backup generators are used to ensure the components have uninterrupted power.

UPS SYSTEM

Their purpose is to maintain the infrastructure until consistent power returns, or if needed, until longer-term emergency power backup systems kick in. They also suppress power surges so they don't damage equipment.

MAXX offers a one-stop Power solution to all its Custom, providing support in UPS maintenance (All brands) and UPS Manufacturing.

Max Systems Pvt. Ltd.

# Providing AMC support of Non-IT Equipment's from last 35 years in...

- Data Centers

- Private Office

- Banks

- School

- Hospital

- State Office

- Labs

We Work Hard So Your Data Center Never Sleeps...

Max Systems Pvt. Ltd.

Call Management Procedure

Helpdesk Receives the call. Identifies the equipment type, logs the call & updates the customers with the call tickets

Technical Experts identify the problems. This activity is done within 30 minutes

Location Engineer Informed

If not possible from NOC/HUB

If diagnostics & resolution possible from NOC/HUB

Call closed within 2 hours

Engineer reaches site within 4 hours

Engineer performs diagnostics

If diags don't resolve i.e spares are required

Replace the required part from spares stocked

Call closed

If diags resolve the issue

Call closed

Spares Replenshed
